

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of the claims in the application. Claims 184, 194, 201, 216, 226, 236, 243, and 258 are canceled in this amendment. No new matter is added.

Claims 1-180 (canceled)

Claim 181 (previously presented): A sheet structure comprising:

- a first layer;
- a second layer attached to a planar surface of the first layer;
- the first layer and the second layer at least substantially forming a multi-layered sheet;
 - first, second, third, and fourth continuous cut lines cut completely through the first layer but not entirely through a thickness of the multi-layered sheet;
 - the first and second cut lines being parallel to each other;
 - the third and fourth cut lines being parallel to each other and perpendicular to the first and second cut lines and intersecting them;
 - the multi-layered sheet and the first cut line being constructed and adapted to cause the sheet structure or a portion thereof to split i) on at least a portion of the first cut line and ii) through the entire sheet structure, when the sheet structure or a portion thereof is bent on the first cut line upwardly only once or downwardly only once;
 - the multi-layered sheet and the second cut line being constructed and adapted to cause the sheet structure or a portion thereof to split i) on at least a portion of the second cut line, and ii) through the entire sheet structure, when the sheet structure or a portion thereof is bent on the second cut line upwardly only once or downwardly only once;
 - the multi-layered sheet and the third cut line being constructed and adapted to cause the sheet structure or a portion thereof to split i) on at least a portion of the third cut line, and ii) through the entire sheet structure, when the sheet structure or a portion thereof is bent on the third cut line upwardly only once or downwardly only once;
 - the multi-layered sheet and the fourth cut line being constructed and adapted to cause the sheet structure or a portion thereof to split i) on at least a portion of the fourth cut line, ii) through the entire sheet structure, and iii) into separate sheet portions that are

configured to be separated apart from one another, when the sheet structure or a portion thereof is bent on the fourth cut line upwardly only once or downwardly only once;

the sheet structure having a lower bottom-most surface, and respective portions of the lower bottom-most surface forming lower bottom-most surfaces of the separate sheet portions; and

the sheet structure having a top upper-most surface, and respective portions of the top upper-most surface forming top upper-most surfaces of the separate sheet portions.

Claim 182 (previously presented): The sheet structure of claim 181, wherein at least one of images or characters are printable on at least one of the first layer or the second layer by passing the sheet structure through a printer.

Claim 183 (previously presented): The sheet structure of claim 181, wherein the cut lines are configured by their depth, groove width and shape to provide the split.

Claim 184 (canceled)

Claim 185 (previously presented): The sheet structure of claim 181, wherein the multi-layered sheet includes a paper layer.

Claim 186 (previously presented): The sheet structure of claim 181, wherein the first layer or the second layer is a cellulosic layer.

Claim 187 (canceled)

Claim 188 (previously presented): The sheet structure of claim 181, wherein the sheet structure is photoreceptive.

Claim 189 (previously presented): The sheet structure of claim 181, wherein the first layer is a printing paper or film, and the second layer includes dissolved resin directly applied to the printing paper or film to form the multi-layered sheet.

Claim 190 (previously presented): The sheet structure of claim 181, wherein a surface of the multilayered sheet is adapted to receive a printed image or character.

Claim 191 (previously presented): The sheet structure of claim 181, wherein the cut lines are die cut lines.

Claim 192 (previously presented): The sheet structure of claim 181, wherein the second layer is a resin film.

Claim 193 (previously presented): The sheet structure of claim 181, wherein the separate sheet portions includes a portion of the first layer and a portion of the second layer secured to the portion of the first layer.

Claims 194-196 (canceled)

Claim 197 (previously presented): The sheet structure of claim 181, wherein the first and second cut lines both engage opposing edges of the multi-layered sheet.

Claim 198 (previously presented): The sheet structure of claim 197, wherein the third and fourth cut lines both engage opposing edges of the multi-layered sheet.

Claim 199 (previously presented): The sheet structure of claim 181, further comprising a fifth cut line parallel to either the first or third cut line and cut completely through the first layer but not entirely through a thickness of the multi-layered sheet.

Claim 200 (previously presented): A sheet structure comprising:
a first layer;
a second layer attached to a planar surface of the first layer;
the first layer and the second layer at least substantially forming a multi-layered sheet having perimeter edges;

a plurality of continuous cut lines cut completely through the first layer but not entirely through the thickness of the multi-layered sheet, the plurality of cut lines including a plurality of horizontal cut lines and a plurality of vertical cut lines in a grid therewith, and the plurality of cut lines defining a plurality of sheet portions on the multi-layered sheet;

at least one of the first and second layers being selected and constructed, and the cut lines being configured, such that the sheet structure can be bent upwardly only once, or downwardly only once, along at least some of the plurality of cut lines, to thereby be split i) along the at least some of the plurality of cut lines, and ii) through the entire sheet structure, to separate the sheet portions of the sheet structure into a plurality of individual sheet portions that are configured to be separated apart from one another;

each edge of each of the individual sheet portions is formed by one of the split cut lines or one of perimeter edges; and

each of the individual sheet portions including a portion of the first layer and a portion of the second layer secured to the portion of the first layer.

Claim 201 (canceled)

Claim 202 (previously presented): The sheet structure of claim 200, wherein at least one of images or characters are printable on at least one of the first layer or the second layer by passing the sheet structure through a printer.

Claim 203 (previously presented): The sheet structure of claim 200, wherein the cut lines are configured by their depth, groove width and shape to provide the split.

Claim 204 (previously presented): The sheet structure of claim 200, wherein the multi-layered sheet includes a paper layer.

Claim 205 (previously presented): The sheet structure of claim 200, wherein each of the plurality of sheet portions has a size determined by a user selecting the plurality of cut

lines to be split, so that when separated from the sheet structure, the plurality of sheet portions form individual sheet portions of desired sizes.

Claim 206 (previously presented): The sheet structure of claim 205, wherein the sheet structure is photoreceptive.

Claim 207 (previously presented): The sheet structure of claim 200, wherein the first layer or the second layer is a cellulosic layer.

Claim 208 (previously presented): The sheet structure of claim 200, wherein the first layer is a printing paper or film, and the second layer includes dissolved resin directly applied to the printing paper or film to form the multi-layered sheet.

Claim 209 (previously presented): The sheet structure of claim 200, wherein a surface of the multilayered sheet is adapted to receive a printed image or character.

Claim 210 (previously presented): The sheet structure of claim 200, wherein the cut lines are die cut lines.

Claim 211 (previously presented): The sheet structure of claim 200, wherein the cut lines include horizontal and vertical cut lines forming a matrix on the first layer.

Claim 212 (previously presented): The sheet structure of claim 200, wherein the second layer is a resin film.

Claim 213 (canceled)

Claim 214 (previously presented): The sheet structure of claim 200, wherein the sheet structure has a lower bottom-most surface, and respective portions of the lower bottom-most surface form lower bottom-most surfaces of each of the individual sheet portions.

Claim 215 (previously presented): The sheet structure of claim 214, wherein the sheet structure has a top upper-most surface, and respective portions of the top upper-most surface form top upper-most surfaces of each of the individual sheet portions.

Claim 216 (canceled)

Claim 217 (previously presented): The sheet structure of claim 200, wherein the plurality of continuous cut lines includes parallel first and second cut lines and parallel third and fourth cut lines positioned perpendicular to the first and second cut lines.

Claim 218 (previously presented): The sheet structure of claim 217, wherein the first and second cut lines both engage opposing edges of the multi-layered sheet.

Claim 219 (previously presented): The sheet structure of claim 218, wherein the third and fourth cut lines both engage opposing edges of the multi-layered sheet.

Claim 220 (previously presented): The sheet structure of claim 217, wherein the plurality of continuous cut lines includes a fifth cut line parallel to the first and second cut lines.

Claim 221 (previously presented): The sheet structure of claim 200, wherein the entire perimeters of each of the individual sheet portions are formed by the cut lines.

Claim 222 (previously presented): The sheet structure of claim 200, wherein the sheet structure is photoreceptive.

Claim 223 (previously presented): A sheet structure comprising:
a first layer;
a second layer attached to a planar surface of the first layer;
the first layer and the second layer at least substantially forming a multi-layered sheet;

first, second, third, and fourth continuous cut lines cut completely through the first layer but not entirely through a thickness of the multi-layered sheet;

the first and second cut lines being parallel to each other;

the third and fourth cut lines being parallel to each other and perpendicular to the first and second cut lines and intersecting them;

the multi-layered sheet and the first cut line being structurally capable of causing the sheet structure or a portion thereof to split i) on at least a portion of the first cut line, and ii) through the entire sheet structure, when the sheet structure or a portion thereof is bent on the first cut line upwardly only once or downwardly only once;

the multi-layered sheet and the second cut line being structurally capable of causing the sheet structure or a portion thereof to split i) on at least a portion of the second cut line, and ii) through the entire sheet structure, when the sheet structure or a portion thereof is bent on the second cut line upwardly only once or downwardly only once;

the multi-layered sheet and the third cut line being structurally capable of causing the sheet structure or a portion thereof to split i) on at least a portion of the third cut line, and ii) through the entire sheet structure, when the sheet structure or a portion thereof is bent on the third cut line upwardly only once or downwardly only once;

the multi-layered sheet and the fourth cut line being structurally capable of causing the sheet structure or a portion thereof to split i) on at least a portion of the fourth cut line, ii) through the entire sheet structure, and iii) into separate sheet portions that are configured to be separated apart from one another when the sheet structure or a portion thereof is bent on the fourth cut line upwardly only once or downwardly only once; and

the separate sheet portions including a portion of the first layer and a portion of the second layer secured to the portion of the first layer.

Claim 224 (previously presented): The sheet structure of claim 223, wherein at least one of images or characters are printable on at least one of the first layer or the second layer by passing the sheet structure through a printer.

Claim 225 (previously presented): The sheet structure of claim 223, wherein the cut lines are configured by their depth, groove width and shape to provide the split.

Claim 226 (canceled)

Claim 227 (previously presented): The sheet structure of claim 223, wherein the multi-layered sheet includes a paper layer.

Claim 228 (previously presented): The sheet structure of claim 223, wherein the first layer or the second layer is a cellulosic layer.

Claim 229 (previously presented): The sheet structure of claim 223, wherein a perimeter edge of the sheet structure forms a portion of a perimeter of at least one of the sheet portions.

Claim 230 (previously presented): The sheet structure of claim 223, wherein the sheet structure is a photo-receptive sheet structure.

Claim 231 (previously presented): The sheet structure of claim 223, wherein the first layer is a printing paper or film, and the second layer includes dissolved resin directly applied to the printing paper or film to form the multi-layered sheet.

Claim 232 (previously presented): The sheet structure of claim 223, wherein a surface of the multilayered sheet is adapted to receive a printed image or character.

Claim 233 (previously presented): The sheet structure of claim 223, wherein the cut lines are die cut lines.

Claim 234 (previously presented): The sheet structure of claim 223, wherein the second layer is a resin film.

Claims 235 and 236 (canceled)

Claim 237 (previously presented): The sheet structure of claim 223, wherein the sheet structure has a lower bottom-most surface, and respective portions of the lower bottom-most surface form lower bottom-most surfaces of the separate sheet portions.

Claim 238 (previously presented): The sheet structure of claim 237, wherein the sheet structure has a top upper-most surface, and respective portions of the top upper-most surface form top upper-most surfaces of the separate sheet portions.

Claim 239 (previously presented): The sheet structure of claim 223, wherein the first and second cut lines both engage opposing edges of the multi-layered sheet.

Claim 240 (previously presented): The sheet structure of claim 239, wherein the third and fourth cut lines both engage opposing edges of the multi-layered sheet.

Claim 241 (previously presented): The sheet structure of claim 223, further comprising a fifth cut line parallel to either the first or third cut line and cut completely through the first layer but not entirely through a thickness of the multi-layered sheet.

Claim 242 (previously presented): A sheet structure comprising:

- a first layer;
- a second layer attached to a planar surface of the first layer;
- the first layer and the second layer at least substantially forming a multi-layered sheet having perimeter edges;

- a plurality of continuous cut lines cut completely through the first layer but not entirely through the thickness of the multi-layered sheet, the plurality of cut lines including a plurality of horizontal cut lines and a plurality of vertical cut lines in a grid therewith, and the plurality of cut lines defining a plurality of sheet portions in the multi-layered sheet;

- at least one of the first and second layers and the cut lines being structurally capable of causing the sheet structure when bent upwardly only once, or downwardly only once, along at least some of the plurality of cut lines, to thereby be split i) along the

at least some of the plurality of cut lines, and ii) through the entire sheet structure, to separate the sheet portions of the sheet structure into a plurality of individual sheet portions that are configured to be separated apart from one another;

each edge of each of the individual sheet portions is formed by one of the split cut lines or one of the perimeter edges; and

each of the individual sheet portions including a portion of the first layer and a portion of the second layer secured to the portion of the first layer.

Claim 243 (canceled)

Claim 244 (previously presented): The sheet structure of claim 242, wherein at least one of images or characters is printable on at least one of the first layer or the second layer by passing the sheet structure through a printer.

Claim 245 (previously presented): The sheet structure of claim 242, wherein the cut lines are configured by their depth, groove width and shape to provide the split.

Claim 246 (previously presented): The sheet structure of claim 242, wherein the multi-layered sheet includes a paper layer.

Claim 247 (previously presented): The sheet structure of claim 242, wherein each of the plurality of individual sheet portions has a size determined by a user selecting the plurality of cut lines to be split, so that when separated from the sheet structure, the plurality of individual sheet portions form individual sheet portions of desired sizes.

Claim 248 (previously presented): The sheet structure of claim 247, wherein the sheet structure is a photo-receptive sheet structure.

Claim 249 (previously presented): The sheet structure of claim 242, wherein the first layer or the second layer is a cellulosic layer.

Claim 250 (previously presented): The sheet structure of claim 242, wherein the first layer is a printing paper or film, and the second layer includes dissolved resin directly applied to the printing paper or film to form the multi-layered sheet.

Claim 251 (previously presented): The sheet structure of claim 242, wherein a surface of the multilayered sheet is adapted to receive a printed image or character.

Claim 252 (previously presented): The sheet structure of claim 242, wherein the cut lines are die cut lines.

Claim 253 (previously presented): The sheet structure of claim 242, wherein the cut lines include horizontal and vertical cut lines forming a matrix in the first layer.

Claim 254 (previously presented): The sheet structure of claim 242, wherein the second layer is a resin film.

Claim 255 (canceled)

Claim 256 (previously presented): The sheet structure of claim 242, wherein the sheet structure has a lower bottom-most surface, and respective portions of the lower bottom-most surface form lower bottom-most surfaces of each of the individual sheet portions.

Claim 257 (previously presented): The sheet structure of claim 256, wherein the sheet structure has a top upper-most surface, and respective portions of the top upper-most surface form top upper-most surfaces of each of the individual sheet portions.

Claim 258 (canceled)

Claim 259 (previously presented): The sheet structure of claim 242, wherein the plurality of continuous cut lines includes parallel first and second cut lines and parallel third and fourth cut lines perpendicular to the first and second cut lines.

Claim 260 (previously presented): The sheet structure of claim 259, wherein the first and second cut lines both engage opposing edges of the multi-layered sheet.

Claim 261 (previously presented): The sheet structure of claim 260, wherein the third and fourth cut lines both engage opposing edges of the multi-layered sheet.

Claim 262 (previously presented): The sheet structure of claim 259, wherein the plurality of continuous cut lines includes a fifth cut line parallel to the first and second cut lines.

Claim 263 (previously presented): The sheet structure of claim 242, wherein the entire perimeters of each of the individual sheet portions are formed by the split cut lines.

Claim 264 (previously presented): The sheet structure of claim 242, wherein the sheet structure is a photo-receptive sheet structure.

Claims 265-268 (canceled)

Claim 269 (previously presented): The sheet structure of claim 200, wherein the portion of the first layer and the portion of the second layer are coextensive with one another.

Claim 270 (previously presented): The sheet structure of claim 223, wherein the portion of the first layer and the portion of the second layer are coextensive with one another.

Claim 271 (previously presented): The sheet structure of claim 242, wherein the portion of the first layer and the portion of the second layer are coextensive with one another.

Claim 272 (previously presented): The sheet structure of claim 181, wherein the cut lines are die cut lines, the second layer is a resin film, and a surface of the multi-layered sheet is adapted to receive a printed image or character.
